

## **CBFR SC ENCOUNTER REPORT**

**Date:** April 2011

**Report #** DMSC042011

**Title:** Women claims to communicate with Bigfoots

**State:** South Carolina

**County:** Anderson

**Nearest City:** Anderson

**Weather:** NA

**Date of Encounter:** NA

### **Encounter Details:**

Invisibly in Bigfoots/Etra-Biological Entity Factor: I have to be honest because if you had asked me that question 2 years ago my thoughts were its nothing but non-sense even though I had a UFO encounter years before. Because of recent personnel encounters in the field I now keep more of an open mind in my search for answers. What made me really thing if this possibility was a 78 year old women in Starr, SC I interviewed during the summer of 2011. She claimed that she never saw the Bigfoots (up to 30+) she only communicated with 1 female BF, and she would only talk to her during times when she was meditating at her hut by the creek. She said they stayed invisible and that the reason they would not show their selves to her was because in their past experience humans are frightened away by their ugliness and their foul odor. She claimed that these Bigfoots were put here as guardians of the forest by the White Aliens. The White Aliens were sent here to keep us from destroying the world the keepers of peace you could say. She told me that the Whites have already saved the earth once when I believe the Russians/US tried to fire a nuclear weapon and the White Aliens disabled the computers keeping us from WW3. The reasons there are so many in the area is the concentration of quartz that for some reason the Aliens are attracted to. I then asked her if I could go with her and communicate with them. She looked at me like I was crazy and said, "Anyone can but you don't need any special powers?" She then wanted to know why I was seeking these beings and after I explained it to her she said that they can always keep a step ahead of you and only if they want to show their selves to me will I see them. I would also have to come with pure intentions and no trickery. I then asked her if they could hurt you and her answer was surprising; it's not them (the biggies) you have to worry about; it's the Greys that imitate the pure natured Bigfoots that are the bad ones who can hurt you or take you away. I can honestly say I was in a trance like states listening to this woman tell me these things. She went on to say that right now the greys have been forced off the earth for a period of time but when they return we had better watch out. She also said that the earth could never be destroyed because the White Aliens would intervene in any attempt to destroy it by man.

I wanted a fellow investigator to talk to this woman as I knew he had more experience with the concepts she had told me about. She told me if I wanted to she would take me to her meditation hut sometime in the future but unfortunately I never got that opportunity, she passed away a few months after I meet

her. I can however get permission to go to the site and possibly hope to do that in the future. What struck me as strange is the fact that she passed away only a few months after I interviewed her, she seemed in perfect health. After reading her obituary her credentials and accomplishments in life were admirable and spoke volumes about this woman. I had no idea how many lives this woman had touched and was glad I had a chance to meet her.
