

CBFR NC ENCOUNTER REPORT

Date: February 13, 2014

Report#DPNC03

Title: Road crossing of a possible Bigfoot

State: North Carolina

County: Guilford

Nearest City: Stokesdale

Weather: Clear

Date of Encounter: Fall of 2013

Encounter detail:

Two sisters were on their way home from work around 11:00 PM. As they rounded a sharp curve in the road something described as big and dark colored (dark brown or black) ran across the road in an east to west direction. The animal was bipedal and was seen from only the waist down. They both said it was moving very fast. The driver had to slam on the brakes to keep from hitting it.

The general area where this incident occurred has had a long history of Bigfoot sighting going back approx 60 years or so.

I conducted a phone interview with both witness's and they both told me the same thing I feel they both were truthful about the encounter they had. I also talked to some of the other family members of the two girls and the family said that they came into the house scared to death at what they had saw that night.

I feel it is highly likely that the girls seen a Bigfoot cross the road that night,unkown to the witness's there are two other sighting's within a few thousand yards from where they had their encounter and a 14"x5" track was cast just a few years before just down the road.
