Date: 5/12/16
Report DPSC01

Title: Stalking in SC

State: South Carolina
County: Clarendon

Nearest City: Sumter
Weather: Rain/day

Date: 4/22/14

Encounter Detail

The witness and his wife was visiting old family land in Clarendon county SC. The area is Rural and he had driven down an old muddy road to a point where he felt it was better to park and get out and walk his wife decided to stay in the truck as it was raining off and on. He was just in the area for a little while and felt the need to look at the old area of his family farm before heading back to his home state of LA.

Witness described the area as thicket foliage surrounding the muddy dirt road he was walking down. At some point on his walk away from his truck He had the feeling of being watched as he proceeded down the road further he could hear something bipedal walking along beside him following him along behind the thick foliage. At times he would even catch a glimpse of a dark figure, it was this point he started taken photos at the areas he was hearing walking. He decided to return to the truck because he started to feel uneasy.

He made his way back to the parked truck and headed out. Later that day he and his wife were talking about what he had experienced and started to look over some of the photos he had taken.

Unknown to him his wife had taken photos too of the surrounding area herself from the cab of truck. In one shot there seems to be an unknown animal resembling a Bigfoot in the rear view mirror sticking its head out of brush looking toward truck. It moves from one shot to another. Witness was not aware at the time. They only noticed this after the fact and were looking over all the pics they had taken that day.

The witness himself all so took one photo of a dark area of heavy brush and here seems to show a head and shoulders of something big.

I have reviewed all of the photos and agree there was something there but unclear as to what. I cannot be 100% sure so I will withhold posting pics till I'm able to get them enhanced to show more detail.

After talking to the witness over the phone a couple of times and reviewing the photo's I believe it possible he was stalked by a Bigfoot; He's was quite sincere in telling his story and I felt the need to share.

His story like so many more go unreported for years.
